

Satcom TRAILER TRAK

Satcom **Trailer Trak** is a small device with GSM/GPRS and GPS connectivity and is able to get device coordinates and transfer them via GSM network.

Trailer Trak is perfectly suitable for trailer applications.

Geo-Fence function allows to set restricted geo-graphic areas and device will send warning messages whenever the object crosses the zone (in or out).

Remote Panic Buttons (Option) can be used with Trailer Trak to send a silent alert to a central monitoring centre.

Satcom's **Trailer Trak** is ideal for the tracking of trailers, plant and machinery. It is powered from the side lights or the ABS system.

Alarm Monitoring. 24/7/365 alarm monitoring is available for Satcom Trailer Trak devices. When activated, a silent alert is sent to the central monitoring centre where the alert is acted upon as per pre-agreed standing orders.

Auto Brake Lock System. (Option) Satcom Trailer Trak is compatible with the Satcom brake locking system. Trailer brakes can be remotely applied or released on demand.
